WHAT IS CLAIMED IS:

1.   A method for providing wagering interfaces comprising:

configuring a first wagering interface on a first wagering platform;

storing a configuration of the first wagering interface; and

displaying a second wagering interface on a second wagering platform that is consistent with the configuration of the first wagering interface.

2.   The method of claim 1 wherein configuring the first wagering interface comprises selecting a wagering preference.

3.   The method of claim 2 wherein selecting the wagering preference comprises selecting a wagering sport.

4.   The method of claim 2 wherein selecting the wagering preference further comprises selecting a player type, wherein the player type is one of beginner, intermediate, or advanced wagerer.

5.   The method of claim 2 wherein selecting the wagering preference further comprises selecting and ordering menu options for display in the first wagering interface.

6.   The method of claim 2 wherein selecting the wagering preference further comprises selecting the wagering preference for the second wagering interface.

7.   The method of claim 2 wherein selecting the wagering preference further comprises selecting a

different wagering preference for the second wagering interface.

8.   The method of claim 1 wherein configuring the first wagering interface comprises selecting a default wagering selection.

9.   The method of claim 1 wherein storing the configuration comprises storing a preference and a default wagering selection in a database.

10.   The method of claim 9 comprising providing the database in a wagering data hub.

11.   The method of claim 9 comprising providing the database in a subscriber management system.

12.   The method of claim 9 comprising providing the database in the first wagering platform.

13.   The method of claim 1 wherein storing the configuration comprises storing a preference and a default wagering selection in multiple databases.

14.   The method of claim 1 wherein displaying the second wagering interface comprises retrieving the configuration from the first wagering platform.

15.   The method of claim 14 further comprising processing the configuration so that the second wagering interface is suitable for display on the second wagering platform.

16. A system for providing a wagering interface comprising:

a first wagering platform that configures a first wagering interface;

a storage unit containing a configuration from the first wagering interface; and

a second wagering platform that displays a second wagering interface consistent with the configuration from the first wagering platform.

17. The system of claim 16 wherein the first wagering platform is a set-top box.

18. The system of claim 16 wherein the first wagering platform is a computer.

19. The system of claim 16 wherein the first wagering platform is a two-way data enabled cellular telephone.

20. The system of claim 16 wherein the first wagering platform is a telephone.

21. The system of claim 16 wherein the first wagering interface comprises a wagering preference selected by a wagerer.

22. The system of claim 16 wherein the first wagering interface comprises a default wagering selection selected by a wagerer.

23. The system of claim 16 wherein the storage unit comprises a database.

24. The system of claim 23 wherein the database is located in a wagering data hub.

25. The system of claim 23 wherein the database is located in a subscriber management system.

26. The system of claim 23 wherein the database is located in the first wagering platform.

27. The system of claim 16 wherein the storage unit comprises multiple databases.

28. The system of claim 16 wherein the second wagering platform is a set-top box.

29. The system of claim 16 wherein the second wagering platform is a computer.

30. The system of claim 16 wherein the second wagering platform is a two-way data enabled cellular telephone.

31. The system of claim 16 wherein the second wagering platform is a telephone.

32. The system of claim 16 wherein the second wagering interface comprises a wagering preference selected by a wagerer from the storage unit.

33. The system of claim 16 wherein the second wagering interface comprises a default wagering selection from the storage unit.
